CALIBRATION

Valid To: June 30, 2024

Certificate Number: 2357.21

In recognition of the successful completion of the A2LA evaluation process, accreditation is granted to this laboratory to perform the following calibrations^{1, 7}:

I. Dimensional

Parameter/Equipment	Range	CMC ^{2, 4} (\pm)	Comments
Calipers – Inside & Outside ³	Up to 4 in (4 to 12) in (12 to 48) in	(58 + 0.51L) μ in (70 + 0.38L) μ in (15 + 4.9L) μ in	Gage blocks
Micrometers – Inside, Outside, & Depth ³	Up to 4 in (4 to 12) in (12 to 48) in	(8.0 + 7.7L) μ in (39 + 3.8L) μ in (69 + 15L) μ in	Gage blocks
Pin & Plug Gages	Up to 6.0 in	(6.1 + 1.5L) μ in	Pratt & Whitney Universal Lab Master™
Length Indicators & Transducers ³	Up to 4 in (4 to 12) in	(4.9 + 2.0L) μ in (7.3 + 3.1L) μ in	Pratt & Whitney Universal Lab Master™
Flatness ³	Up to 1 in	6.1 μ in	Optical flats

(A2LA Cert. No. 2357.21) Revised 09/01/2022

Stopwatches & Timers ³	(0.0 to 86 400) s	0.039 s/day	Timometer 4500

¹ This laboratory offers commercial calibration service and field calibration service.

² Calibration and Measurement Capability Uncertainty (CMC) is the smallest uncertainty of measurement that a laboratory can achieve within its scope of accreditation when performing more or less routine calibrations of nearly ideal measurement standards or nearly ideal measuring equipment. CMCs represent expanded uncertainties expressed at approximately the 95 % level of confidence, usually using a coverage factor of $k = 2$. The actual measurement uncertainty of a specific calibration performed by the laboratory may be greater than the CMC due to the behavior of the customer's device and to influences from the circumstances of the specific calibration.

³ Field calibration service is available for this calibration. Please note the actual measurement uncertainties achievable on a customer's site can normally be expected to be larger than the CMC's found on the A2LA Scope. Allowance must be made for aspects such as the environment at the place of calibration and for other possible adverse effects such as those caused by transportation of the calibration equipment. The usual allowance for the actual uncertainty introduced by the item being calibrated, (e.g. resolution) must also be considered and this, on its own, could result in the actual measurement uncertainty achievable on a customer's site being larger than the CMC's.

⁴ In the statement of CMC, L is the numerical value of the nominal length of the device measured in inches. R is the numerical value of the resolution of the device measured in inches. LSD is the least significant digit. Percent is percent of reading unless marked otherwise.

⁵ The stated measured values are determined using the indicated instrument (see Comments). This capability is suitable for the calibration of the devices intended to measure or generate the measured values in the ranges indicated. CMCs are expressed as either a specific value that covers the full range or as a percent or fraction of the reading plus a fixed floor specification.

⁶ The contributions from the “best existing device” are not included in the CMC claim.

⁷ This scope meets A2LA's *P112 Flexible Scope Policy*.

- ⁸ The type of instrument or material being calibrated is defined by the parameter. This indicates the laboratory is capable of calibrating instruments that measure or generate the values in the ranges indicated for the listed measurement parameter.

Accredited Laboratory

A2LA has accredited

TEKTRONIX, INC.

Timonium, MD

for technical competence in the field of

Calibration

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017 General requirements for the competence of testing and calibration laboratories. This laboratory also meets the requirements of ANSI/NCSL Z540-1-1994 and the requirements of ANSI/NCSLI Z540.3-2006 and R205 – Specific Requirements: Calibration Laboratory Accreditation Program. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

Presented this 12th day of July 2022.

A blue ink signature of a person's name, likely the Vice President of Accreditation Services.

Vice President, Accreditation Services
For the Accreditation Council
Certificate Number 2357.21
Valid to June 30, 2024

For the calibrations to which this accreditation applies, please refer to the laboratory's Calibration Scope of Accreditation.
